## Disclaimer:

Please note that Lightstone obtains data from a broad range of 3rd party sources and – despite the application of proprietary data cleaning processes – cannot guarantee the accuracy of the information provided in this report. It is expressly recorded that information provided in this report is not intended to constitute legal, financial, accounting, tax, investment, consulting or other professional advice.

This report does not contain any confidential information relating to the property owner or any owners residing in the suburb. All bond, home loan and property registration information in the reports is from the Deeds Office where information on all property registrations, property transfers as well as all registered bonds / home loans are kept. This is public domain information and accessible by any person.

### Explanatory notes and definitions:

The **Municipal Valuation Details** are the valuation details provided by the relevant municipality and represent the market value assessed for rates purposes as at the date of valuation.

Lightstone standardises the usage classification according to the information received from the municipalities. Monthly rates are calculated on the municipal valuation amount, and disregards special conditions, rebates and consent use etc., as this is agreed on an entity by entity basis with the municipality.

The Aerial/Satellite Imagery obtained from both the relevant municipality (where available) and from Google. Both images offer zooming and panning functionality that enables users to examine the property and the area in detail. The municipal imagery offers measurement functionality that enables users to determine the distance between points or the area under roof. The municipal imagery also shows the location of the comparable sales referred to in the comparable sales and enables accurate comparative analysis.

The **Comparable Sales Table** shows the details of the 20 most relevant comparable sales and the comparable sales map shows where these comparable sales are in relation to the subject property. Comparable sales are based on the most comparable residential property transfers excluding extreme outliers and potential land sales.

The **Suburb Trends** graphs show the average price and total volume of sales in the suburb by property type for the last 10 + years. The median purchase price is the midpoint of all the purchase prices in the area. It is less affected by isolated outlying values and a stable indication of the typical transaction price in the area. Sectional title garage units, extreme outliers and probable land sales have been filtered before the median is calculated in order to reflect developed property price trends.

The Transfer History shows the previous two transfers for the subject property.

The Amenities listing shows the closest amenities to the subject property including the suburb they are in and distance from the subject property.
