National Inflation

Current annual inflation rate is 1.85% and monthly is 0.11%.

Annual vs. Monthly

Market Review

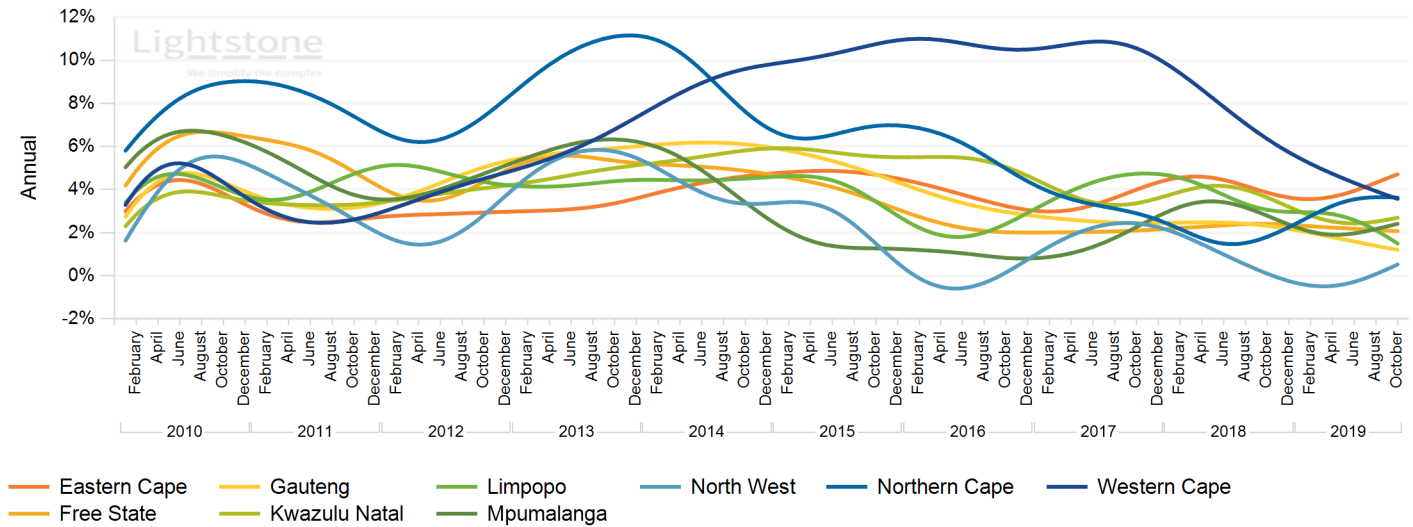

National house price inflation peaked at 6.35% per annum in 2014 during the market's recovery following the 2007-2008 crash and has been slowly decreasing thereafter closing at a five-year low of 1.7% in 2019. This reflects the low market activity as buyers find it expensive to buy property and current homeowners refuse to sell for less than they bought in the presently sluggish economy.

In January 2020 the Monetary Policy Committee (MPC) announced a reduction in the benchmark interest rate by 25 basis points to 6.25%, and that is positive news for the consumers' budget. However, it is not enough to offset the rise in fuel costs, electricity and other basic utility rates, and further stimulate market activity. We therefore expect the market to remain in consolidation with a good chance of lesser growth and activity in 2020.

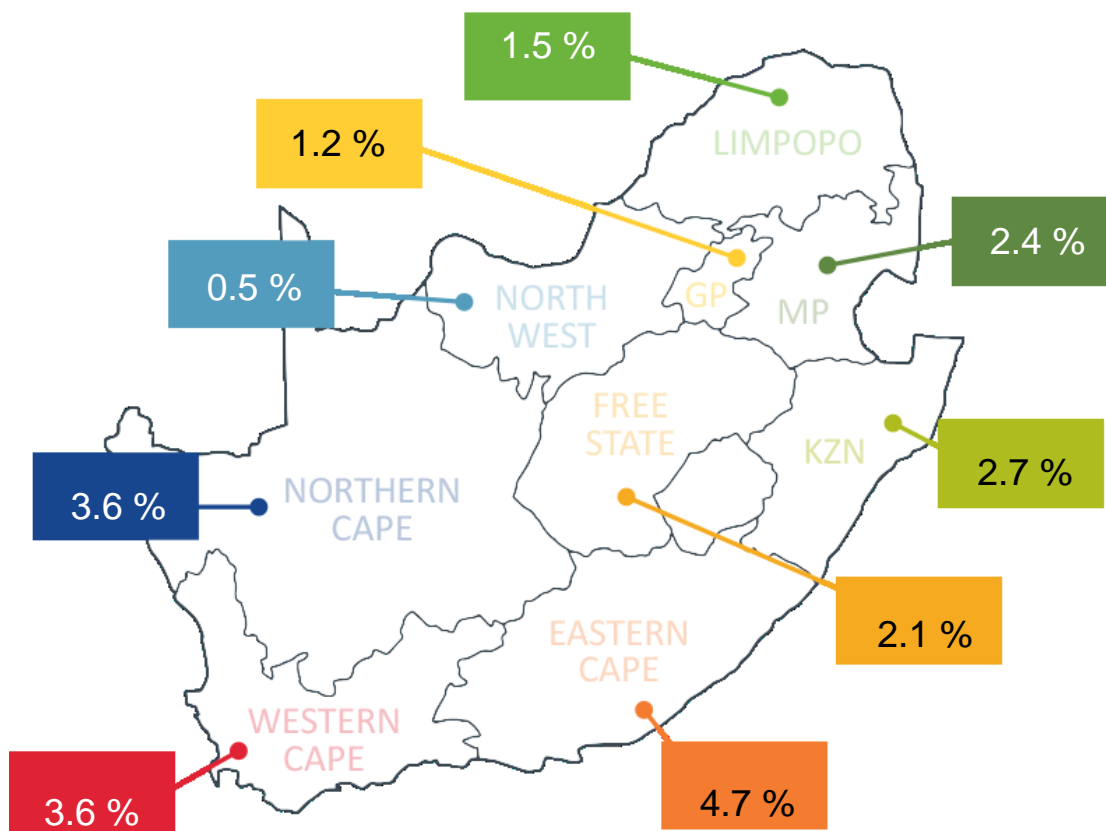

Provincial Inflation

The Lightstone Provincial Index tracks annual inflation of all provinces in South Africa.

Annual Inflation: Provinces

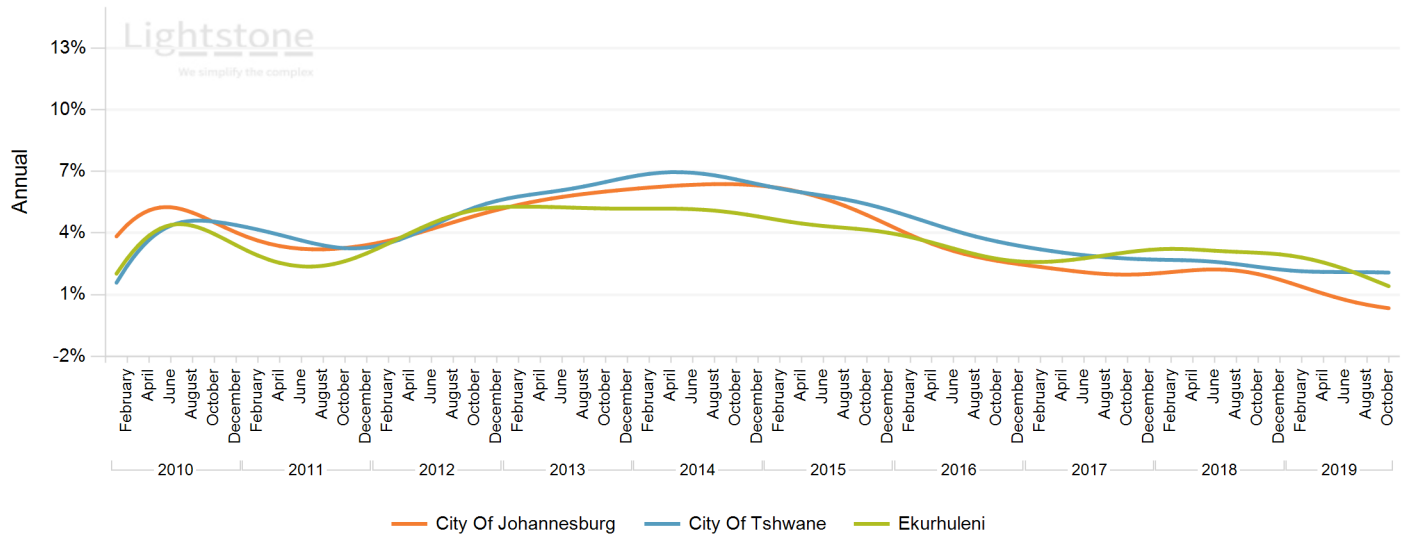

Latest/Current Provincial Inflation Status

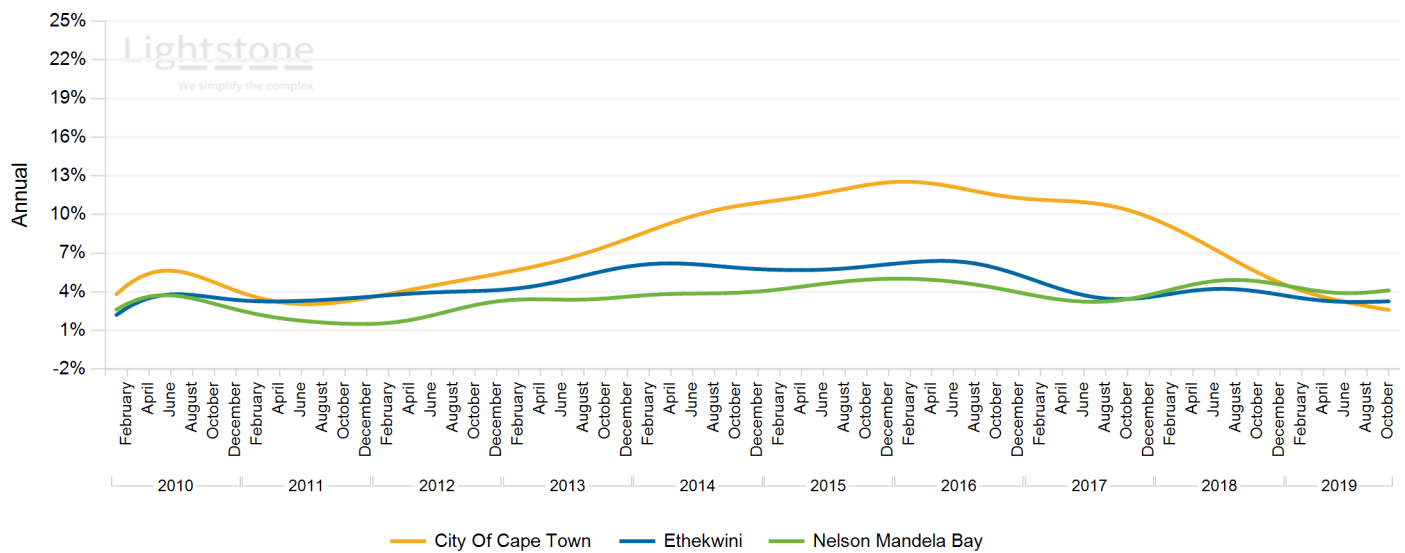

Municipal Inflation

The Lightstone Municipal Index tracks annual inflation at a municipal level, with coastal and inland based municipalities reviewed independently.

Annual Inflation: Inland Municipalities

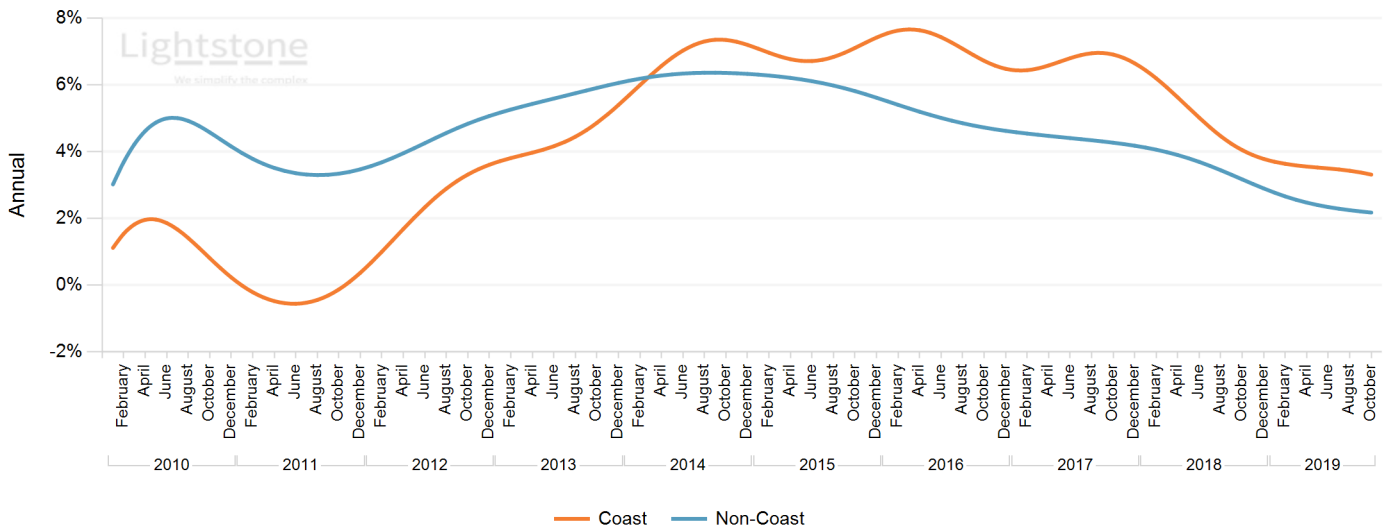

Annual Inflation: Coastal Municipalities

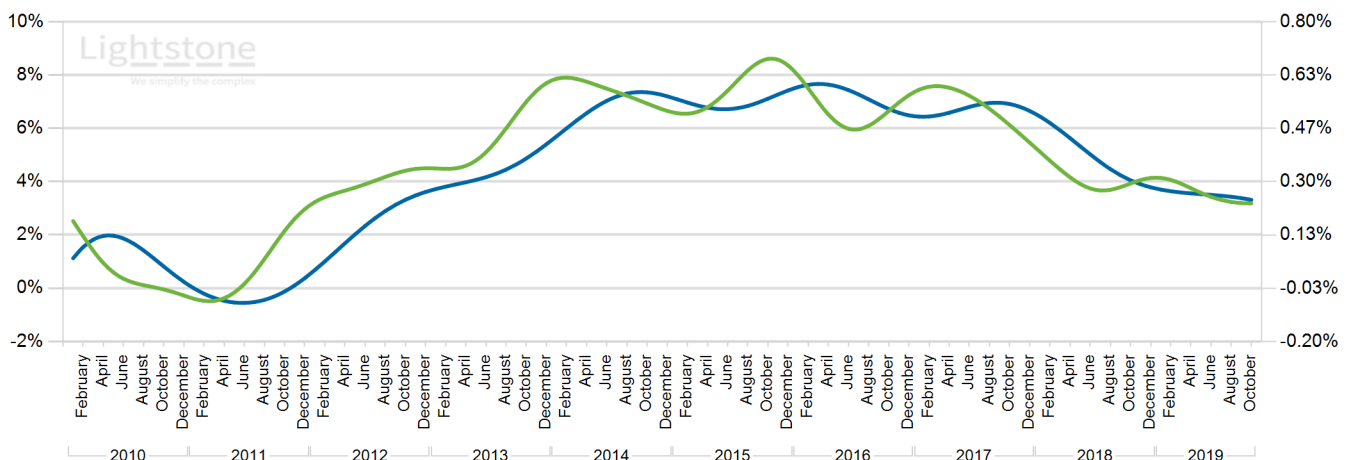

Property Inflation: Coast vs Non-Coast

The Lightstone Coast vs Non-Coast Index compares property located within enumerator areas 500m of the coastline to those located

Shining A Light On Our Approach...

Methodology:

Lightstone applies the repeat sales methodology when reviewing and reporting on property data. In contrast to 'average house price' indices, repeat sales indices provide a measure of the actual price inflation of houses that have transacted twice within a particular period of time. The main benefit of this is that it is less influenced by the mix of transacting properties. The repeat sales methodology is recognised as the premier methodology for indexing house prices and is used by many international residential property price indexers including the Office of Federal Housing Enterprise Oversight (OFHEO) in the United States.

Data:

All property transactions in South Africa are registered in the Deeds Office and each record contains the legal details of both the property and the transaction. For the purposes of the Repeat Sales Index for residential properties, the following transactions have been excluded: farms; any transactions which may be of a development, commercial or community services nature; new developments; sales made in execution of a judgement; non-arms-length transactions; transactions where the inflation is extremely different to the norm of the statistical distribution of inflation rates; and township transactions.

Caution:

Lightstone presents both annual and monthly inflation rates. Monthly inflation emphasises recent market performance (i.e. month on month) and is more volatile than annual inflation trends. Conclusions about the future trend of annual inflation, based on monthly inflationary rates, must be made with caution.

Disclaimer:

The Lightstone Repeat Sales Index system applies advanced statistical methods to a comprehensive property database - compiled from the Deeds Office, the Surveyor General and other sources - to generate repeat sales inflation data for individual residential properties. Despite the statistical and actuarial rigour applied, Lightstone cannot guarantee the accuracy and reliability of the data. Furthermore, the index is a statistical tool and does not amount to advice and may not be applicable in some cases. Lightstone does not take responsibility for any losses incurred as a result of any person acting or omitting to act as a result of the publication of this index.
